Annotation: On the Strategy of Actions for the Development of Youth in the Spirit of Military and Patriotism for 2017-2021. This article discusses the use of modular education in the provision of knowledge in the field of military education in educational institutions, the development of assignments on relevant topics, as well as the organization and evaluation of control over their implementation.

Keywords: patriotism, labor, training, education, soldier, military didactics.

The concept of educating young people in the spirit of military patriotism was adopted. In this concept, the issue of educating young people in the spirit of military patriotism is considered as an integral and integral part of the integrated education system for the upbringing of a physically and spiritually healthy generation. - Special attention was paid to the issue of improvement in line with political changes. One of the important tasks of the pedagogical staff of educational institutions is to master the theory and practice of military-patriotic education of young people, to prepare them for military service, to perform their duties in defense of their homeland - the Republic of Uzbekistan. What do we mean by "homeland" and "patriotism"?

"Homeland" is a sacred feeling that has been polished for thousands of years, inspiring the souls of people, encouraging brave boys to be brave and, if necessary, to sacrifice their lives for the motherland.

We are talking about educating young people in the spirit of military patriotism. In accordance with the Resolution of the Cabinet of Ministers of the Republic of Uzbekistan No. 140 of February 23, 2018, the concept of educating young people in the spirit of military patriotism was adopted in our country.

It is safe to say that strengthening the education of military patriotism is becoming an urgent task. Strengthening military patriotic education remains a problem. But we are very grateful to our President Shavkat Mirziyoyev Miramonovich. It is safe to say that there is a lot of news in the field of military patriotism.

Over the past three years, great work has been done to reform the Armed Forces of the Republic of Uzbekistan, strengthen the material and technical base, introduce modern methods of command and control, increase the combat readiness of soldiers and officers, improve their working conditions, housing and social security. President Shavkat Mirziyoyev Miramonovich.

President Shavkat Mirziyoyev Miramonovich In 2019, great innovations will be introduced, including a new law, resolution, new decree, programs. Here is a brief overview. The adoption of 7 laws, 50 decrees and resolutions, more than 20 programs and "road maps" in the field of defense in 2019 alone shows how much importance is attached at the state level to the comprehensive solution of these issues.

President Shavkat Mirziyoyev Miramonovich said that in 2019, in the ranks of the Armed Forces and in our society as a whole, military-patriotic education,

Special attention is paid to the strengthening of spirituality, the effective conduct of spiritual and educational work among soldiers and officers, who perform their sacred youthful duty as defenders of the Motherland, the greatest and noblest work in the world.

It is well known from history that if a country wants to achieve its lofty goal of development by protecting its independence, inviolability of borders, peace and tranquility of the people, it must first strengthen its national army, its decisive military force, ie soldiers and officers. first

This is what the head of our state Shavkat Mirziyoyev Miramonovich said at the meeting in 2019.

Of course, there are many directions, areas and branches of such an educational process. However, in the opinion of Shavkat Mirziyoyev Miramonovich, its most important direction is spiritual and educational upbringing

Shavakat Mirziyoev Miramonovich. words

"If through physical and combat training, servicemen are physically healed and strengthened, their hearts, souls and will will be strengthened through spiritual and enlightenment education."

How can we live without knowing our current history. He who does not know Tarnix does not find his place in life if he does not know his custom. When we talk about our heroic ancestors, our brave soldiers, "brave", "ransom", "courageous", "fearless", "brave", "brave", " baklavon >>, we will mention separately. Isn't it a spiritual and enlightenment upbringing that forms such noble qualities in every person and motivates our young men to become a shield for the Motherland, a real hero, and even to sacrifice their lives when necessary?

The concept that underlies such education is central to the national spirit. It would be correct to say that the national spirit is formed in man along with the mother goddess, his white milk. Therefore, in carrying out spiritual and educational work in our Armed Forces, in general, in our entire social life, first of all, "parents", "family", "dear village", "dear neighborhood", "mother - city" Particular attention should be paid to the interpretation of the concepts of "motherland".

Of course, this is a very complex task, and the essence of such sacred concepts cannot be conveyed to the hearts of our young people with dry words. To do this, first of all, it is necessary to bring them into the world of such noble values.

It would not be a mistake to say that the words of our great ancestor Amir Temur: "A man of courage and determination, determined and vigilant, are better than thousands of careless and indifferent people" were about the military.

In our glorious history, there are many examples of the victory of our great commanders, such as Jaloliddin Manguberdi, Amir Temur, Zahriddin Muhammad Babur, over a large army of the enemy with a small army.

When we hear the words of the patriotic Milatevar, we instinctively see the images of our great ancestors Shirak Tomars Alpomish Jaloliddin Manguberdi Namazbotir and the great master Amir Temur.

We, like them, strive to be a worthy generation for the Motherland, for the Uzbek people

From our recent past, we bow before the noble sons of our nation, Osman Nasir, Fitrat, Cholpon and other great figures who lived under the Soviet government. Their patriotism, courage, their sacrifice for the bright future of the Uzbek people, their lives for the development of the nation will remain a school of life for the younger generation - the school of patriotism.
